**REDEFINING LUGGAGE LOCKS & IT'S INDUSTRY**  
**WORLD'S 1<sup>ST</sup> eGeeTouch® SMART COMBINATION LOCKS LAUNCH AT 2015**  
**INTERNATIONAL TRAVEL GOODS SHOW**

**Las Vegas, Nevada – Mar. 10, 2015 – DIGIPAS USA LLC** launches today the world's 1<sup>st</sup> eGeeTouch® smart combination locks, strategically innovated to replace the outdated conventional digit-wheel combination locks and key padlocks. DIGIPAS USA, located in The International Travel Goods Show Booth #3077, is demonstrating all new eGeeTouch® products line throughout the 2015 International Travel Goods Show.

The world's-1st patented **eGeeTouch®** NFC-driven Smart Combination Lock is embedded with state-of-art proximity access security & smart identification technologies; requiring **no key, no digit-wheel** dials and **no code-memorizing** to safeguard personal belongings during a trip unmatched by any conventional keyed/digit-wheel combination lock. This radically innovative smart lock offers **multiple access methods** enabling users to access luggage contents using their own NFC-enabled devices e.g. smartphone or tagged wallet. The lock is **TSA compliance** preventing luggage or travel bags being damaged by inspecting custom officers in airports. Coupled with proprietary authentication protocols capable of generating over 100millions encrypted codes stored in the Mobile App & One-Touch functions, this smart lock provides a **truly hassle-free travel experience** for increasingly mobile worldwide frequent travelers & holiday makers.

*"We are pleased to launch our new eGeeTouch Smart Combination Locks at the 2015 International Travel Goods Show, a leading global platform for the travel goods industry.*

*In addition, we are delighted and honoured that eGeeTouch Smart Luggage Lock is a winner of the prestigious CES Innovation Awards, validating of our leading-edge innovation and products," said Dr Jim Li, inventor & group CEO for DIGIPAS USA LLC.*

**Luggage or zipper lock should not be less secure..... or be constrained by cumbersome mechanical dials or keys! With eGeeTouch® enhanced security and simplified One-touch unlocking** features empowered by advanced encryption and proximity access-gaining technologies, many of those 'unsecured' conventional luggage assembled with 'outdated' digit-wheels and key locks shall envisaged soon be the past! In short, this radically new innovation of **DIGIPAS USA LLC** is set to **redefine** the access-gaining method for modern luggage/suitcase and could potentially **revolutionize** the travel bag industry.

The eGeeTouch® Smart Luggage Lock is a **winner of the 2015 International CES Innovation Awards** under the Tech for Better World category for its outstanding innovation, engineering design and positive impact in enhancing the quality of life for the increasingly mobile worldwide travellers.

Introduced at the **2015 International CES**, Las Vegas, eGeeTouch® Smart Luggage Lock received extensive global-leading media coverage such as **USA Today, CNET, Engadget, Fox News, Yahoo Travel, Daily Mail, The Verge, CBS News, WIRED**, etc.

*"8 of the most innovative products at CES designed to keep you safe" by Fox News*

*"Never worry about losing your keys again! Introducing the suitcase lock that opens with a swipe of your PHONE", by Mail Online (UK)*

*"CES 2015 preview: 9 high-tech gadgets that are turning heads", by CBS News*
